# REVOLVING LAND CONSERVATION PROGRAM

The Revolving Land Conservation Program (RLCP) provides an opportunity for greater impact on the landscape. Through this program, DUC purchases a piece of land, restores its wetlands and grasslands and then makes it available to potential buyers in the agricultural community after placing a conservation easement (CE) on the title. Proceeds from these land sales go back into DUC programs to fund further conservation work. **RLCP land is an ideal fit for cattlemen and is compatible with waterfowl production.**

## UPCOMING RLCP PROPERTY SALES & SPECIFICATIONS
