

DUC-owned properties in Ontario

It is the user's responsibility to ensure they are accessing properties that are the sole property of DUC and abide by firearm discharge guidelines of that municipality. Hunters are reminded that some of these properties have public trails on them and must ensure the safety of all users. Additionally, these properties continue to undergo restoration, management, and routine maintenance. At times there may be DUC contractors and staff working on the property that could affect access to the property.

We are pleased to be able to provide opportunities for the public to enjoy DUC properties. These are truly special places that the hard-earned dollars and support of our members, the local community, and other important funders have helped us secure and protect. Please respect them as you enjoy their beauty and please continue to support DUC and our wetland conservation efforts so we can acquire more of these special places.
