

A charitable donation has been made in your name to Give a Duck.

This donation will conserve the habitat that ducks need to thrive and maintains that habitat for decades to come, supporting future generations. The habitat conserved on your behalf also does so much more! It provides a better future for us all, by:

- + Regulating water quality and quantity, protecting our communities from both flooding and drought
- + Supporting more than 500 wildlife species in addition to ducks — from the smallest dragonfly to the largest moose
- + Storing carbon to help shield us from the effects of climate change

Learn more about the science and conservation work that makes it all possible at ducks.ca/give-a-duck
