

CONSERVATION PRO
A PROUD DIVISION OF DUCKS UNLIMITED CANADA

Fish and Aquatic Habitat Services

Conservation PRO provides comprehensive fish and aquatic habitat services, offering practical, science-based solutions to support responsible planning, environmental stewardship, and long-term habitat health. Whether your project involves maintaining infrastructure, improving natural areas, or addressing impacts to aquatic systems, our team delivers tailored support from start to finish.

Our services include:

- 🌿 **Fish and SAR Habitat Offsetting** – When avoiding impacts is not possible, we design and implement effective offsetting strategies for Fisheries Act Authorizations as well as reptile and amphibian species-at-risk.
- 🌿 **Land acquisition for offsite fish habitat services** – Securing appropriate land is essential for creating effective, long-term habitat solutions.
- 🌿 **Fish and Benthic Invertebrate Monitoring** – We provide rigorous monitoring and detailed reporting to ensure your restoration projects are on track and delivering the intended outcomes.
- 🌿 **Habitat monitoring and management** – We oversee ongoing habitat management, ensuring the sustainability of restored aquatic environments over time.
- 🌿 **Construction Supervision** – Our team ensures the construction is done according to plan, follows environmental standards, and provides oversight to ensure compliance with all regulations.

We understand that no two projects are alike. That's why we don't offer a one-size-fits-all approach — our solutions are designed for the needs and goals of your project, ensuring your habitat offsetting is effective and compliant.

Ducks Unlimited Canada provides environmental consulting services on a cost-recovery basis, directing net revenue to habitat conservation in Canada.

Our projects: Proven success in habitat restoration

Conservation PRO has a proven track record of successful fish habitat offsetting projects, giving you the confidence that we can design a solution tailored to meet your requirements. Our projects focus on:

- **Restoring degraded habitats** – We transform areas of single-species vegetation into open-water habitats, remove invasive species and enhance complexity of watercourses
- **Removing barriers to improve fish movement** – We work to eliminate obstacles that hinder fish movement and access to critical habitat areas.
- **Detailed design plans** – Our team provides comprehensive project plans that support the creation, monitoring and management of fish habitats, tailored for long-term sustainability.

Why Choose Conservation PRO?

- **Land availability** – We provide access to suitable land across Ontario, ensuring the right location for your offset project.
- **Environmental ROI** – We deliver low-maintenance, long-lasting, cost-effective solutions that ensure a strong return on investment - including reinvesting net revenue back into wetland conservation efforts.
- **Expert team** – Our national team of wetland engineers, biologists and environmental experts provides unmatched technical expertise and support.
- **Trusted and recognized brand** – We are a leading conservation organization, trusted by government officials, industry leaders and the public.
- **Long-term commitment** – We are equipped to manage long-term projects, ensuring the lasting success of your habitat offsetting efforts.

Eight decades of experience in conservation

Ducks Unlimited Canada is Canada's most trusted environmental charity. Since 1938, we have partnered with landowners to restore and conserve critical habitats for wildlife and communities. In Ontario, we've completed more than 5,000 restoration projects, conserving more than one million acres of wetlands and surrounding habitats. We take great pride in our ability to deliver exceptional return on conservation investments – and with more than 85 years of proven results, we are your trusted partner in fish habitat offsetting and environmental stewardship.

Partner with Ducks Unlimited Canada to ensure your project meets regulatory requirements while making a positive impact on the environment.
